

Bifurcation diagram of saddle/spiral bimodal linear systems

Ferre, Josep; Pena, Marta; Susin, Antonio

We complete the study of the bifurcations of saddle/spiral bimodal linear systems, depending on the respective traces T and \tilde{I}_2 : one 2-codimensional bifurcation; four kinds of 1-codimensional bifurcations. We stratify the bifurcation set in the (T, \tilde{I}_2) -plane and we describe the qualitative changes of the dynamical behavior at each kind of bifurcation point
