

Mechanisms of abdominal distension in severe intestinal dysmotility: abdomino-thoracic response to gut retention

Barba, Elisabeth; Quiroga, Sergi; Accarino, Anna; Monclus, Eva; Malagelada, C.; Burri, E; Navazo, Isabel; Malagelada, JR; Azpiroz, Fernando

Basal conditions

Distension episode

We previously showed that abdominal distension in patients with functional gut disorders is due to a paradoxical diaphragmatic contraction without major increment in intraabdominal volume. Our aim was to characterize the pattern of gas retention and the abdomino-thoracic mechanics associated with abdominal distension in patients with intestinal dysmotility.
